### **3 March 2022, Staff feedback :**

- Compared to recent SDA surveys completed in Nov 2021 - Good to see positivity improved in 2022.
- All student feedback is above 50% for wellbeing.
- Free play equipment has support students, students are happy physically. Tu Manawa Fund supported purchase of equipment that has provided play and outdoor opportunities without a school playground.
- Despite difficult end to 2021 students have come back to school happier at the start of 2022. They enjoy the social aspects of school in seeing their friends in person rather than online or in home isolation.

#### Next Steps:

- Taha Whanau
- Sharing on social media the positive, happy and healthy environment. Parents enjoy seeing videos of students praying and worship e.g Ps Tata assembly. Keep these up to showcase to parents.
- School values - dig deeper into these to support behaviour, positive mindset and good habits.
- Include peer discussions and interactions in class learning to grow positive, social interactions. Lots of talk and sharing, defining ideas.

### **14 March 2022, Proprietor feedback :**

- Physically we have strong players in our local team sports.
- House groups is good to see contributing to wellbeing, social and physical interactions.
- School camp in the past has been good. Need to keep this going.
- Luke 10:27 - Love the Lord your God with all your heart and with all your soul and with all your strength and with all your mind. This aligns well with the Whare Tapa Wha Health model.
